

## PRESS RELEASE

### Volato – BRC Aircraft Association

**Bauru, Brazil, November 14, 2024** – BRC Aircraft and Volato have come to an agreement of long term association to utilize their strengths in bringing Volato 400 and 200 on Worldwide markets through BRC Aircraft network of Build Centres and its distribution channels.

“After years of searching for a great four and two seat fast composite aircraft, we are happy to announce our Association with Volato Aerospace company with a goal of bringing Volato 200 and 400 aircraft onto world aircraft scene through BRC Aircraft Group of Companies” said Zrinko Amerl, CEO of BRC Aircraft Group, and continues “Based on Keep It Simple legacy of aircraft, Volato has developed its aircraft to a comfortable and fast commuter aircraft.”

“For Volato, an Association with BRC Group of Companies is interesting as it gives us an opportunity through their network to build up sales and production in key markets of USA, Canada and Europe” said Zizo Sola, President of Volato and continues “In todays World pilots need assistance to build their Basic Kits into a flying aircraft. BRC Aircraft is the company that will coordinate efforts to get Volato aircraft in the pilots’ hands and in the air in the most effective and shortest time, either direct or through their distribution.”

**Volato Aircrafts and Composites** is Aerospace corporation in composite aircrafts structures, using infusion fiber glass and carbon and located at Bauru - Sao Paulo - Brazil. Volato has developed the experimental aircraft Volato 400, a four-seat aircraft with a modern conception, comfortable, low drag coefficient, economic and extremely easy to fly. Volato stands out in the market with the innovation in composite structures and updated designs. It is currently working on Volato 200, a two-place aircraft.

**BRC Aircraft Group of Companies** is a division of The Banff Rail Co, Inc a Canadian corporation dedicated to building the finest aircraft. It has built centres in Albera, British

Columbia and Quebec in Canada, Libby Montana in the USA and in Sinj, Croatia for European Union. BRC Aircraft Group of Companies within its Group also has Motorstar engine company in Bacau, Romania a producer of 400hp M14PF radial engine and Montana Float Company in Libby Montana, producer of aluminium floats as well as patented Z-drive electric jet propulsion for floats.
